Promoting open education with
open-source technologies for OER

Open-source with system & service

edu-sharing is based on powerful, scalable open-source technologies and can be adapted to your requirements - from the university cloud to a solution for federal states like the school-cloud „LOGINEO“ in North Rhine-Westphalia.

edu-sharing provides education-adapted interfaces as well as integration interfaces to e-learning systems, authoring tools and applications such as Etherpad and MediaWiki. edu-sharing complements the file management of your LMS with a powerful cloud storage. Modernize your LMS! Currently we offer integrations for Moodle, Olat and Iliaas.

Users, groups, and roles can be synchronized with school administration or campus management systems. Folder structures can be created automatically and used for schools, departments or groups. Our service partners offer customization, integration, support, hosting and training. You'll also find the right partner for Alfresco Enterprise and Sharepoint users in our service network.

Workspace: work in privat, with friends or in a team ...

The screenshot shows a desktop application window titled "Workspace". It displays a file tree with items like "Fachschaft Deutsch", "Fachschaft Mathematik", "Verwaltung", and "Grillabend.png". A modal window titled "Lizenz von Mein Arbeitsblatt.docx" is open, showing options for Creative Commons licensing (CC-BY) and a "Version 4.0" dropdown. Below the modal, there's a section for "Dürfen Bearbeitungen des Werks geteilt werden?" with radio buttons for "Ja", "Nein", and "Ja, solange es andere unter gleichen Bedingungen weitergeben". Another section asks "Kommerzielle Nutzung des Werks erlauben?" with radio buttons for "Ja" and "Nein". At the bottom, it says "Aktuell ausgewählte Lizenz CC-BY" and "Autor(in) muss genannt werden."

1 create, share & publish

... and publish with the licence editor.

6 feedback & analysis

A screenshot of a Moodle course page titled "Goehte und die Musik - eine Einführung". The page includes a video player showing a performance of "Faust-Symphonie", a pie chart, and several speech bubbles representing user feedback and analysis.

Use feedback and analysis in learning management systems.

5 use

A screenshot of a learning management system interface showing a "Summary of 10 February - 16 February" section. It includes a rich text editor toolbar, a media library, and a list of activities and resources.

4 collect, arrange & remix

A screenshot of the bintl app interface. It shows a collection of materials with icons for "Meine Sammlungen", "Meine nächsten Unterrichtsstunde", and "Fundstücke aus dem Web". The app has a clean design with a white background and blue accents.

Collect and arrange material with the new app.

3 compilation & distribution

A screenshot of a document editor interface. It shows fields for "Zeilenumbruch", "Didaktik", "Materialart", "Fach- und Sachgebiet", and "Kompetenz". There are also buttons for "ABBRECHEN" and "SPEICHERN".

Collect content and metadata.

2 content discovery & quality assurance

OER-Search on your website or in your app.

A screenshot of a search interface titled "ERWEITERTE SUCHE". It shows search results from "local" and "pixabay" sources. The results include images and text snippets related to topics like "ringe, hochzeit, gold" and "macarons, himbeeren, marmelade".
